

		Common disease			Functional genomics (cellular)			Rare mendelian						Somatic				NA	No human target					
Target	SRP-9001																							
	SER-109																							
	RSVpreF																							
	Olorofim																							
	GSK3844766A																							
	Exagamglogene autotemcel																							
	Efanesoctocog alfa																							
	Bercolagene telserpavec																							
Target	Talquetamab		•											•				•	Oncology					
	Repotrectinib													⊙	⊙	⊙		•						
	Momelotinib															⊙								
Target	Zuranolone		•																Other indication					
	Valoctocogene roxaparvovec	⊙																•						
	Tofersen		•															⊙						
	Nedosiran																							
	Lecanemab		⊙															⊙						
	Donanemab		⊙															⊙						
	Concizumab
