

	Common disease; common genomic (CGI)				Rare mendelian						Somatic				NA		
Piflufolastat F-18																No human target	
Pafolacianine																	
Melphalan flufenamide																	
Maribavir																	
Ibrexafungerp																	
Fosdenopterin																	
Fexinidazole																	
Cabotegravir; rilpivirine																	
Umbrisib																Oncology	
Trilaciclib																	
Tivozanib																	
Tisotumab vedotin																	
Tepotinib																	
Sotorasib																	
Ropeginterferon alfa-2b																	
Mobocertinib																	
Loncastuximab tesirine																	
Infigratinib																	
Dostarlimab																	
Belzutifan																	
Asparaginase erwinia chrysanthemi																	
Asciminib																	
Amivantamab																	
Vosoritide																Other indication	
Voclosporin																	
Viloxazine																	
Vericiguat																	
Tralokinumab																	
Tezepelumab																	
Ponesimod																	
Pegcetacoplan																	
Olanzapine; samidorphan																	
Odevixibat																	
Maralixibat																	
Lona pegsomatropin																	
Inclisiran																	
Finerenone																	
Evinacumab																	
Efgartigimod alfa																	
Drospirenone; estetrol																	
Difelikefalin																	
Dexamethylphenidate; serdexmethylphenidate																	
Dasiglucagon																	
Casimersen																	
Belumosudil																	
Avalglucosidase alfa																	
Avacopan																	
Atogepant																	
Anifrolumab																	
Aducanumab
